Employment History:

Coca-Cola Consolidated, Charlotte, NC

BI Developer II (December 2023 – Present)

- Collaborate with internal teams to gather requirements and design tailored solutions that automate workflows, improve visibility, and drive strategic outcomes.
- Create scalable data visualizations and reporting tools that support operational efficiency and department-level performance tracking.
- Co-lead an enterprise-wide data migration initiative, owning the re-piping of all views, tasks, and stored procedures, ensuring continuity and data accuracy across systems.
- Performed comprehensive data testing and validation coordinating upstream dependencies and validating integration points to ensure a high-fidelity replication of all business-critical assets.

AvidXchange, Charlotte, NC

BI Analyst Intern (June 2023 - August 2023)

- Identified data requirements and wrote custom SQL queries to retrieve complete, accurate datasets for high-priority initiatives, collaborating with internal teams to develop effective reporting solutions.
- Designed, implemented, and presented visually compelling Power BI dashboards utilizing interactive filters and slicers including drill-through and bookmark options to enable intuitive data exploration for client business reviews. These projects streamlined process and resulted in significant time savings for the Customer Excellence Team.

Dornburg Lab, UNC Charlotte, NC

Data Analyst/Researcher (January 2021 - December 2023)

- Extracted and analyzed large scale genomic and RNA-seq data using bash and python scripting for job submission, custom package creation in R, and statistical and phylogenetic comparative analyses. Major projects include a resolved phylogeny of the class Cephalopoda (master's thesis) and contributions to various publications.

Trotter Finishes, Denver, NC

Owner, Business Manager (June 2017 - December 2020)

- Founded a subcontracting construction company specializing in fine wood finish in the commercial and residential sectors with growth rates of 100-150% in yearly revenue for 2 years.

Education

MS Bioinformatics, University of North Carolina Charlotte, Charlotte, NC; Dec 2023
